Abstract

Your abstract.

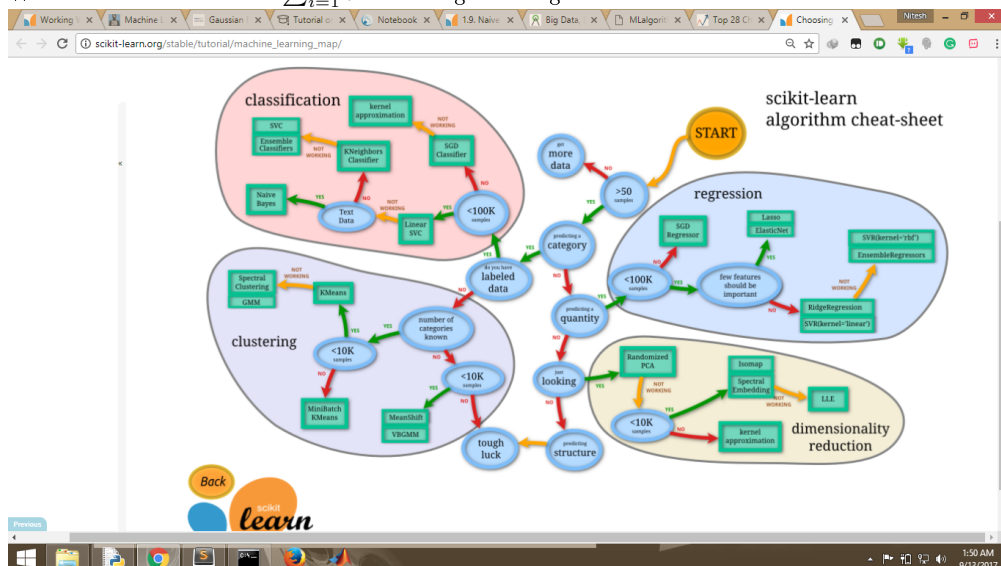

1 Title of section 1

Title of subsection 1 Nitesh

Some text...

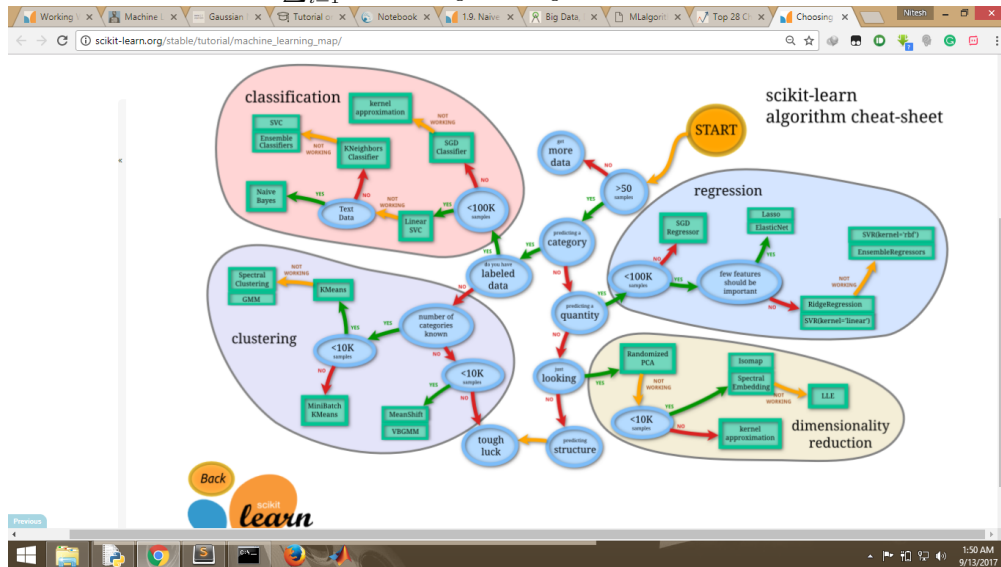

Title of subsection 2 Manish

With some colored math $\sum_{i=1}^{\infty} i$. Inserting an image also works:

Title of subsection 2 Papa

With some colored math $\sum_{i=1}^{\infty} i$. Inserting an image also works:

Title of subsection 2 Momie

With some colored math $\sum_{i=1}^{\infty} i$. Inserting an image also works:

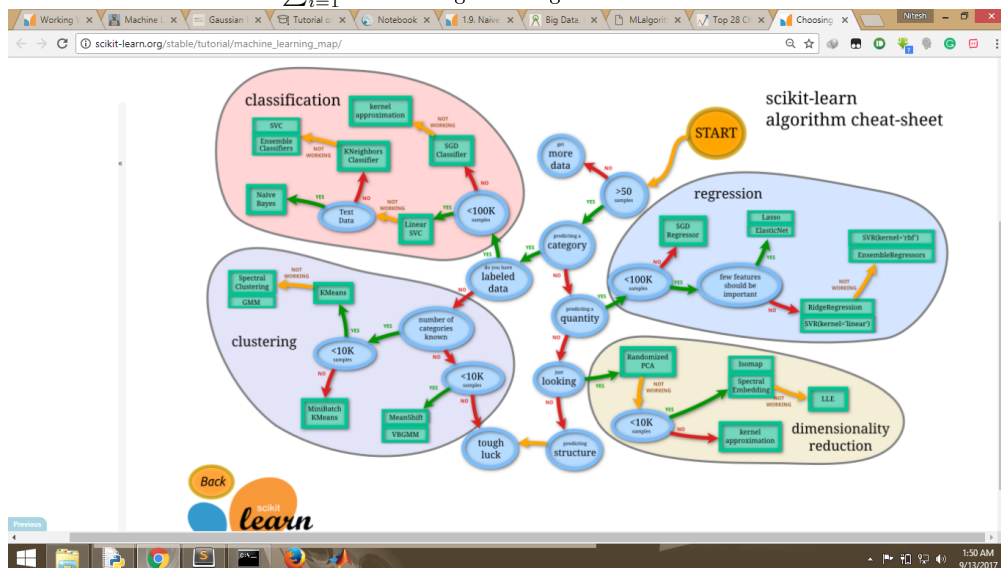

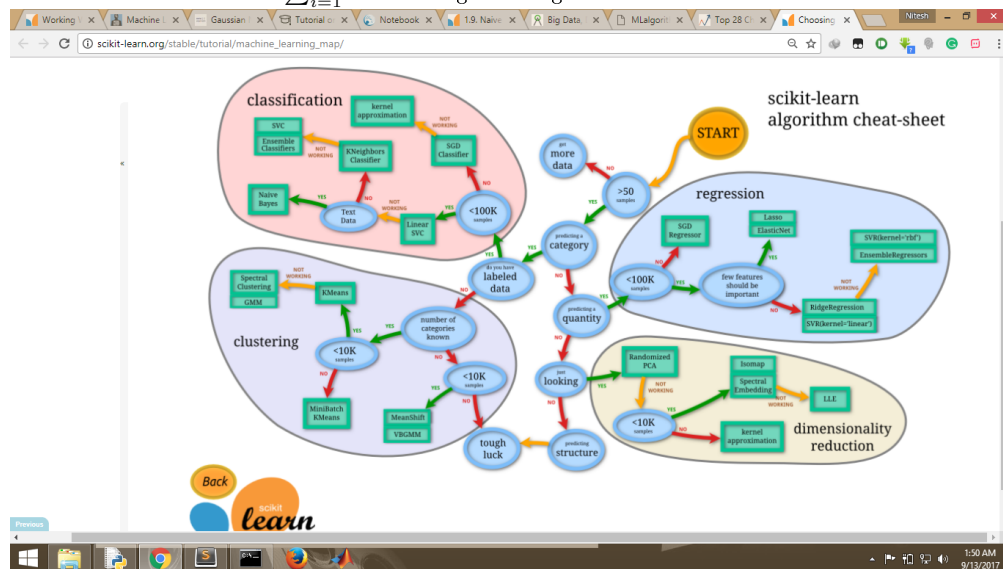

Figure 1: This frog was uploaded via the project menu.

Title of subsection 2 Dreams

With some colored math $\sum_{i=1}^{\infty} i$. Inserting an image also works:

2 Introduction

Your introduction goes here! Some examples of commonly used commands and features are listed below, to help you get started. If you have a question, please use the help menu (“?”) on the top bar to search for help or ask us a question.

3 Some examples to get started

3.1 How to add Comments

Comments can be added to your project by clicking on the comment icon in the toolbar above. To reply to a comment, simply click the reply button in the lower right corner of the comment, and you can close them when you’re done.

3.2 How to include Figures

First you have to upload the image file from your computer using the upload link the project menu. Then use the includegraphics command to include it in your document. Use the figure environment and the caption command to add a number and a caption to your figure. See the code for Figure 1 in this section for an example.

Item	Quantity
Widgets	42
Gadgets	13

Table 1: An example table.

3.3 How to add Tables

Use the table and tabular commands for basic tables — see Table 1, for example.

3.4 How to write Mathematics

L^AT_EX is great at typesetting mathematics. Let X_1, X_2, \dots, X_n be a sequence of independent and identically distributed random variables with $E[X_i] = \mu$ and $\text{Var}[X_i] = \sigma^2 < \infty$, and let

$$S_n = \frac{X_1 + X_2 + \dots + X_n}{n} = \frac{1}{n} \sum_i^n X_i$$

denote their mean. Then as n approaches infinity, the random variables $\sqrt{n}(S_n - \mu)$ converge in distribution to a normal $\mathcal{N}(0, \sigma^2)$.

3.5 How to create Sections and Subsections

Use section and subsections to organize your document. Simply use the section and subsection buttons in the toolbar to create them, and we'll handle all the formatting and numbering automatically.

3.6 How to add Lists

You can make lists with automatic numbering ...

1. Like this,
2. and like this.

... or bullet points ...

- Like this,
- and like this.

3.7 How to add Citations and a References List

You can upload a `.bib` file containing your BibTeX entries, created with JabRef; or import your [Mendeley](#), CiteULike or Zotero library as a `.bib` file. You can then cite entries from it, like this: [?]. Just remember to specify a bibliography style, as well as the filename of the `.bib`.

You can find a [video tutorial here](#) to learn more about BibTeX.

We hope you find Overleaf useful, and please let us know if you have any feedback using the help menu above — or use the contact form at <https://www.overleaf.com/contact>!
